## What is BULO Coin?

---

BULO Coin is a real shitcoin with absolutely no use case and no roadmap! It was created to have fun with the Algorand ecosystem and community.

It is ASA N°**498684064** <https://algoexplorer.io/asset/498684064>

## Is the liquidity locked?

---

Yes!

The liquidity is provided via Tinyman.org and the liquidity pool token is ASA N°**498705616**  
<https://algoexplorer.io/asset/498705616>

You can see here in tinylock that the initial liquidity of 399 liquidity pool tokens is locked until year 2030: <https://tinylock.org/search?asa1=498684064>

It is in the wallet XR7D74QDBFXMLCO5C42ABHJWDOHMQ6K3OIFDUNLNA4AJRYPYPQG63ONVLKI controlled by tinylock.

The address RYGAYDBUXXWHKMMF3SKK2JME22EF4PD47QBMQY3NLYMIXT3ZNZEIIW3VU4 is the tinyman liquidity pool address.

The dev knows we need more liquidity but unfortunately today (2nd of January 2022) tinyman has some security concerns and unlocked liquidity had to be removed.

## Is ownership renounced?

---

Yes!

You can also see in tinylock that there are no manager account, no clawback account, and no freeze account, ownership is renounced! <https://tinylock.org/search?asa1=498684064>

You can double check on the "technical information" tab on algoexplorer:  
<https://algoexplorer.io/asset/498684064>

## Why the name BULO Coin?

---

While the BULO Coin has no use case and no roadmap, the BULO has a background: it plays a big role in the "Erasme Legacy" lore. "Erasme Legacy" is a fun NFT project on the WAX blockchain. It wasn't updated since a long time, but it may one day (no promise here, just wishful thinking)

Learn more about "Erasme Legacy" and the BULO's background here: <https://erasme-legacy.site/>

## Will you make money with BULO Coin ?

---

No, probably not. There is a tiny chance you will make money. There is a huge chance you will lose money

## Will you have fun with BULO Coin ?

---

Yes, a lot of fun!

## Is there an dApp ?

---

Yes, but it's shitty. <https://app.bulocoin.site/>

You can connect using wallet connect, see your Algo, BULO and ALGO-BULO liquidity pool tokens.

You can also opt-in the ASA if it's not already done.

## Is there a roadmap?

---

No, as it should be with all real genuine shitcoins!

# Who are the top holders?

You can check the top holders on Algoexplorer on the "Holders" tab.
